

LIMITED CAPACITY

# Lasers: Science to Clinical Applications

NOVEMBER 23 & 24, 2024

Lecture + Rotating Workstations  
Up to 16 CE credits

**Elevate Your Practice with Laser Dentistry!** Join us at the University of Alberta's Edmonton Clinic Health Academy and explore the transformative potential of laser technology in dental practices. Discover the benefits of dental laser technology for enhancing patient care and the potential benefits the appropriate laser can provide in efficiency and improved treatment outcomes.

## Highlights:

Gain foundational knowledge of laser physics to make informed decisions on laser selection.

Understand how laser technology can enhance patient comfort, reduce healing times, and improve outcomes.

Learn about routine procedures and applications that can be enhanced with laser use in dental practice.

Cover essential safety and infection control protocols and build confidence in selecting the laser type best suited to your specific practice needs.

Speaker:

**Dr. Scott Benjamin**  
DENTIST
