

THIS IS AN ENDO REVOLUTION

UNDERSTANDING PHOTOACOUSTICS WITH LASERS

Plus The Top 10 Procedures to add to your practice this year

DR. GIOVANNI OLIVI FROM ROME, ITALY

COURSE OUTLINE

This course is for both general dental practitioners and specialists who are ready to take their skills and services to the next level.

- **COST \$179.00 (includes GST)**
- **5 PACE C.E. credits**

Join us in Toronto and Vancouver for an in-depth presentation by one of the world leaders in transforming endodontics with Fotona's revolutionary SWEEPS® technology.

AN ENDODONTIC REVOLUTION ONLY AVAILABLE WITH FOTONA LASERS

With 58 years of experience, Fotona laser research and engineering has evolved to create a genuine paradigm shift in Endo, Perio, Restorative Sleep and More!

This technology has opened the door for dentists to improve treatments, add new procedures, and do more in less time.

TORONTO – Friday, February 10, 2023: 10:00 a.m. to 3:00 p.m.
Sheraton Toronto Airport Hotel & Convention Centre 801 Dixon Rd., Toronto, ON

VANCOUVER – Saturday, February 11, 2023: 10:00 a.m. to 3:00 p.m.
Fairmont Waterfront Hotel 900 Canada Pl, Vancouver, BC

FOTONA SWEEPS® BETTER, EASIER, FASTER AND MORE COMFORTABLE

3D Debridement of the entire root canal system ALL FROM THE ACCESS PREP WITHOUT GOING INTO THE CANALS WITH THE LASER.

- Remove 30% - 50% MORE TISSUE than any other form of traditional instrumentation or irrigation.
- Up to 10 TIMES DEEPER DISINFECTION.
- Up to 40% FASTER.
- Fotona does it all without expensive consumables or timely and technique-sensitive preparations.

Overview discussion of MORE THAN 40 APPLICATIONS INCLUDING Anesthesia-Free Restorative, Perio, Peri-implantitis, Extractions, Nightlase, Airway Treatment, Implants, Pain Relief and Healing, and more.

ABOUT DR. GIOVANNI OLIVI

Dr. Giovanni Olivi, MD, DDS is a Cum Laude graduate in Medicine and Surgery from "La Sapienza" University in Rome; he then pursued his studies to obtain his Dentistry degree, Cum Laude, at "Tor Vergata" University in Rome. He is an active member of the Italian Society of Endodontics and an active member of several Italian and International Laser Academies In 2002 Dr. Olivi completed his postgraduate diploma in "Laser Dentistry" from the University of Florence, followed in 2004 by completing his laser certification from ISLD (The International Society for Laser Dentistry).

In 2006 he completed the Advanced Proficiency Course from The Academy of Laser Dentistry, and shortly after, In 2009, he completed the Master status from the same organization.

In 2007 Dr. Olivi received the "Leon Goldman Award" for clinical excellence. He has authored over 80 peer-reviewed papers. As well as four books on Laser Dentistry, the books are available in Italian, English and Chinese.

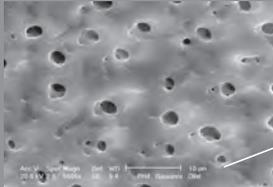

Dr. Giovanni Olivi is a founding member and current president of the International Academy of Innovative Dentistry (IAID) and the Scientific coordinator of the "Laser Dentistry" Masters Degree Course at the Catholic University of Sacred Heart of Rome.

SWEEPS®

PHOTOACOUSTIC ENDODONTICS

The basic protocol for treating root canals hasn't changed in the last 30 years, until now.

A great advance in root canal therapy, the Fotona Lightwalker and SkyPulse Lasers successfully address a major disadvantage of classical chemo-mechanical treatment procedures: the inability to completely clean, debride and disinfect anatomically complex root canal systems. Many root canal treatments fail due to residual bacteria re-infecting the tooth, creating toxic material that can leak into the bone around the tooth and into the bloodstream.

Much like a touchless carwash, SWEEPS removes the infected root inside the tooth using acoustic shockwaves that literally wash the root completely out of the tooth leaving the canal system cleaner than traditional root canal therapy with only metal files. This amazing procedure is also faster.

What is SWEEPS®?

SWEEPS® (Shock Wave Enhanced Emission Photoacoustic Streaming) is an advanced method for cleaning and disinfecting the root canal system. Utilizing the power of the Fotona Lightwalker™ and SkyPulse lasers, doctors create powerful, deeply penetrating shockwaves within the patient's tooth, reaching areas that traditional methods can sometimes miss.

SWEEPS® promises to represent an entirely new way of thinking about root-canal therapy.

With SWEEPS®, patients receive fast, safe and effective root-canal treatments with deep disinfection.

How does it work?

1. Gain access to the canal
Doctor prepares tooth opening using the Fotona™ laser.

2. Minimally invasive instrumentation
Preserve more of the natural tooth structure and thereby improve strength and integrity.

3. Perform SWEEPS® with Fotona™ Laser
SWEEPS® is performed with the Fotona LightWalker™ & SkyPulse™ Lasers and Fotona's exclusive protocol.

4. Obliterate the canal
Tooth canal is sealed, using special compound.

Laser Endodontics

Lightwalker™ & SkyPulse Laser Assisted Irrigation improves the success of endodontic therapy even with complex root structures. It enhances the cleaning and decontamination of root canals for safe, fast, and fewer treatments.
